

ENVIRONMENTAL PURCHASING POLICY

Unlimited flooring Sheffield

Unlimited flooring sheffield recognises the critical need to ensure its sustainability by carrying out its purchasing activities in an environmentally responsible manner.

We will give preference to purchasing environmentally preferable products and services that meet current performance, safety and regulatory requirements. Our Company will continue to source and increase the purchase of products and services that are deemed "environmentally preferable".

We shall therefore undertake to develop purchasing by having regard to quality and cost, which includes:

- specifying wherever possible and reasonably practicable, the use of environmentally friendly or sustainable materials and products
- promoting the use of long lasting and recyclable products
- not using environmentally damaging products where an alternative (product or method) is available
- investigating if it is necessary to purchase the product
- sourcing and purchasing items from local producers and suppliers, wherever possible
- ensuring that all specifications contain a facility for potential suppliers to submit prices for environmentally friendly alternatives.

All purchasing will promote the use of the least environmentally damaging products, i.e. to place a preference, where design and safety factors allow, on goods which are:

- durable, reusable, refillable or recyclable
- recycled or contain reused materials
- from a proven sustainable source
- energy efficient
- designed to cause minimal damage to the environment in their production, distribution, use and disposal
- economically viable and meet the requirements of value for money and quality.

This environmental purchasing policy will be an ongoing procedure to be reviewed at least annually and will take into account both changing circumstances and improved environmental awareness within the Company.
